Environmental Monitoring Report – Blast Monitoring Data

Talbragar Quarry

April 2024

Date Published: 6th May 2024

The monitoring of pollutants provided in this report is undertaken as per the requirements of Environment Protection Licence 899 (EPL 899 – Boral Talbragar Quarry)

This report provides historical environmental monitoring data for Talbragar Quarry for the period January 2016 to Present day. If there is a gap in data presented in the report this is because there was no monitoring data to present for the relevant period.

Talbragar Quarry Information	
Premise Details	Boral – Talbragar Quarry
Address	Brocklehurst, Dubbo, NSW, 2830
Licensee	Boral Resources (Country) Pty Ltd
EPL No	899
EPL Location	https://apps.epa.nsw.gov.au/prpoeoapp/ViewPOEOLicence.aspx?DOCID=170462&SYSUID=1&LICID=899

Monitoring data in this report relates to the monitoring undertaken in the reporting period for the following environmental pollutants:

- Blasting

Blasting

Blast monitoring is conducted as per condition L5 of EPL 899. The blasting monitoring results are summarised below.

Monitoring Period: May 2016 – Present day
Licensee: Talbragar Quarry
Licensee Address: Brocklehurst, Dubbo, NSW 2830
EPL No: 899

Qualifications related to blasting:

L5.1 The airblast overpressure level from blasting operations at the premises must not exceed 120dB (Lin Peak) at any time at any noise sensitive locations. Error margins associated with any monitoring equipment used to measure this are not to be taken into account in determining whether or not the limit has been exceeded.

L5.2 The airblast overpressure level from blasting operations at the premises must not exceed 115dB (Lin Peak) at any noise sensitive locations for more than five per cent of the total number of blasts over each reporting period. Error margins associated with any monitoring equipment used to measure this are not taken into account in determining whether or not the limit has been exceeded.

L5.3 Ground vibration peak particle velocity from the blasting operations at the premises must not exceed 10mm/sec at any time at any noise sensitive locations. Error margins associated with any monitoring equipment used to measure this are not to be taken into account in determining whether or not the limit has been exceeded.

L5.4 Ground vibration peak particle velocity from the blasting operations at the premises must not exceed 5mm/sec at any time at any noise sensitive locations for more than five per cent of the total number of blasts over each reporting period. Error margins associated with any monitoring equipment used to measure this are not to be taken into account in determining whether or not the limit has been exceeded.

Note "Noise sensitive locations" includes buildings used as a residence, hospital, school, child care centre, places of public worship and nursing homes. A noise sensitive location includes the land within 30 metres of the building.

L5.5 Blasting at the premises may only take place between 9:00am - 5:00pm Monday to Friday. Blasting is not permitted on weekends or public holidays.

L5.6 Blasting outside of the hours specified in L4.5 can only take place with written approval of the EPA.

NOTE: A breach of the licence will still occur where airblast pressure or ground vibration levels from the blasting operations at the premises exceeds the limit specified in conditions L4.1 to L4.4 at any "noise sensitive locations".

L5.7 The airblast overpressure and ground vibration levels in conditions L4.1 to L4.4 do not apply at noise sensitive locations that are owned by the licensee or subject to a private agreement, relating to airblast overpressure and ground vibration levels, between the licensee and land owner.

Blast Monitoring Results

Mogriguy farm house	19/10/2017	20/10/2017	16:52	No Trigger	Yes	No Trigger	Yes	
Pig farm	23/06/2017	24/06/2017	09:43	0.262	Yes	109.5	Yes	
Mogriguy farm house	23/06/2017	24/06/2017	09:43	0.190	Yes	108	Yes	
Pig farm	12/01/2017	16/01/2017	10:25	0.2436	Yes	113	Yes	
Mogriguy Farm House	11/08/2016	17/08/2016	09:45	No Trigger	Yes	No Trigger	Yes	
Pig Farm	19/05/2016	20/05/2016	10:39	No trigger	Yes	No trigger	Yes	

Trigger levels set on the blast monitor for air blast were 105 dBL and ground vibration 3.0 mm/s. When these levels are not exceeded then “No Trigger” is described, which confirms that blast limits were below the trigger levels.
